

# webBox mobile

Activation of selected functionalities in the mobile application.

Dear Client,

We would like to inform you about an **upcoming change** regarding mobile access to selected functionalities of our system.

Effective from **1 September 2025**, the use of certain functionalities in the mobile application will require activation.

## Which functions will not require activation?

The PWA webBox Mobile application will remain **available without activation** and allows users to:

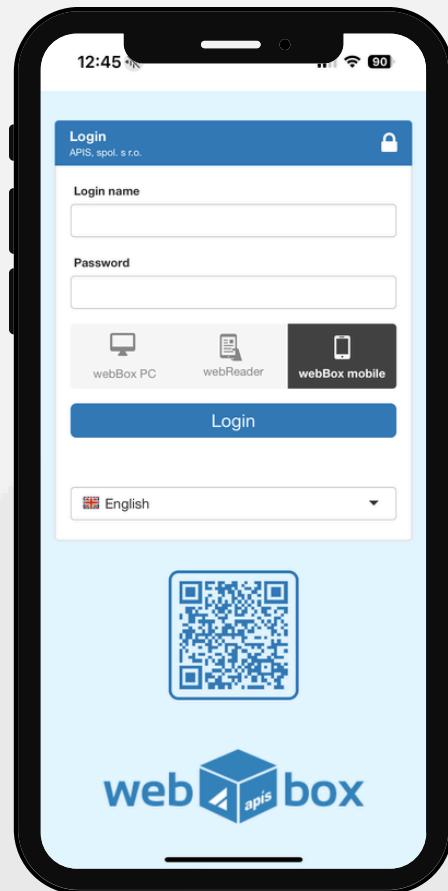

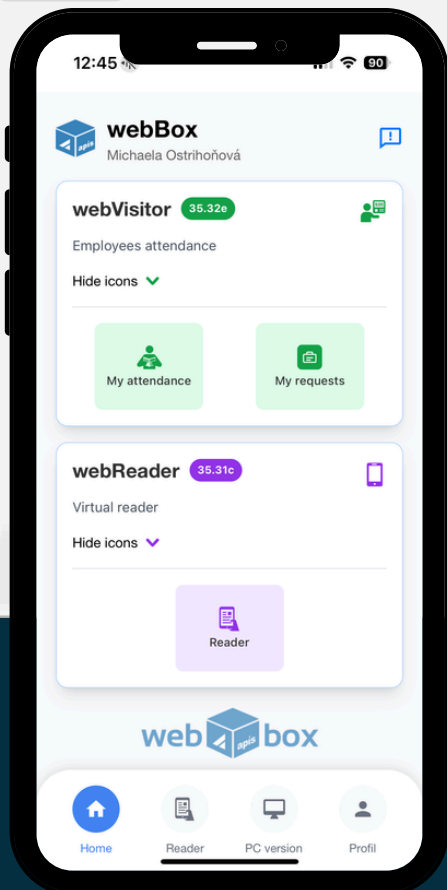

Reader

One-click **attendance registration** via the virtual reader.

My attendance

**My attendance** overview

## Which functions will require activation as of 1 September 2025?

Actual presence

Viewing the **current presence** of employees

My requests

**Submitting requests** for attendance interruption

Approval

**Approval of requests** by a superior

Activation included in the price of the webReader module only until October 1, 2025.

Activate the feature today and make attendance management easier!

cost-effective

## My Attendance

**Keep your attendance under control** – right on your mobile. In real time and without the need to contact HR.

- **Daily and monthly attendance overview** – employees can see when they arrived at work, how many hours they worked, and their current balance – by day and for the entire month.
- **Balances and limits always in sight** – current vacation days, medical leave entitlement, working time fund – all clearly displayed in one place.
- **How much have you worked already?** – an exact overview of hours worked in a given month helps employees plan their time and rest more effectively.

A modern attendance overview increases **transparency and saves time** for both employees and the HR department.

## Current Presence

Display of current employee presence at the workplace

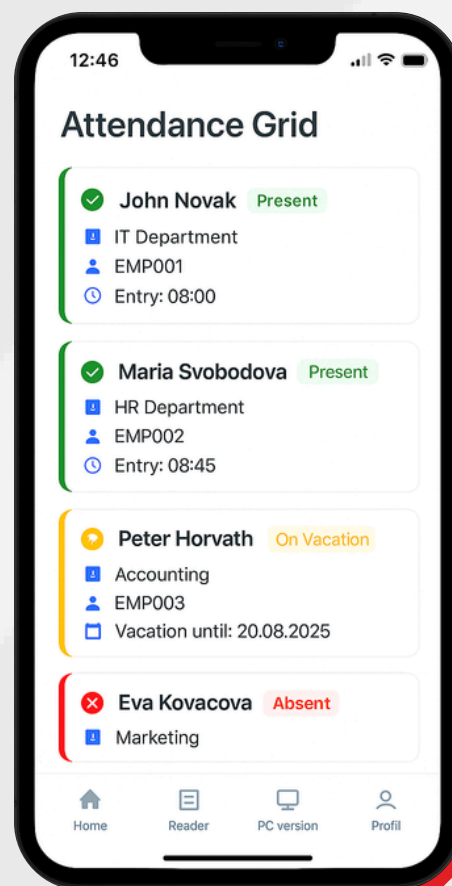

A feature that allows you to have an **instant overview of your employees' attendance status** — right on your mobile, no matter where you are.

Just log into the app and immediately see **who is:**

- Present at the workplace
- Currently working on a task
- Absent (vacation, sick leave, business trip)
- On a break (lunch break, smoking break)
- Already left or finished their shift

**With the mobile app, you always have employee presence under control.**

Available for activation  
from October 1, 2025

My requests

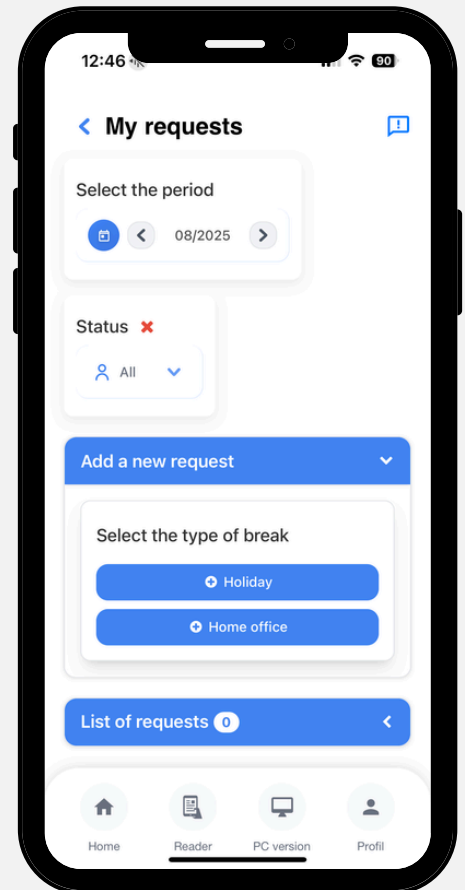

## My requests

### Submitting requests for attendance interruption

Forget about paperwork and complicated processes!

With our app, you can submit requests easily, quickly, and from anywhere — just a few clicks on your mobile.

- **Choose from different types of interruptions** (vacation, home office, business trip, or other types — pick what you need at the moment).
- **Approval according to internal rules** (each employee has access only to their list of approvers — so requests always go to the right supervisor).
- **Transparency and overview** (all submitted requests and their status — approved/rejected/pending — are always at your fingertips in a clear list).

Approval

## Request Approval

Available for  
activation from  
November 1, 2025

### Request Approval – Fast, Simple, and Flexible

Approving requests has never been more convenient. Supervisors or managers can respond to employee requests directly via mobile — no matter where they are.

- **Approve or reject with one click** (a simple interface allows quick decisions without delay).
- **Flexible vacation approval** (approve only the days that suit your operations — you can modify or reject the rest).
- **Mobile approval 24/7** (no delays — you can approve requests even outside the office, while on the go, or from home).

**Make life easier for employees and managers — digitize the request submission and approval process.**

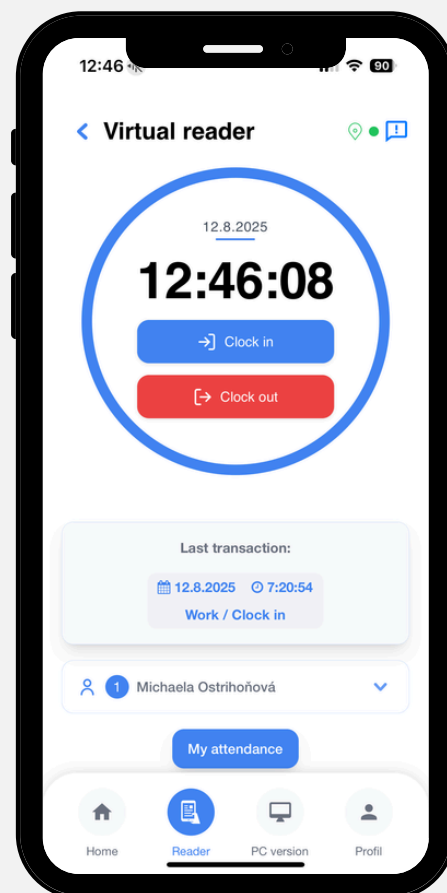

## webReader - virtual reader

**Simplify attendance tracking** for employees in the field, working from home or on the go.

The virtual reader enables reliable sign-in without the need to be physically present at the company.

- **Quick sign-in even outside the office** (ideal for salespeople, technicians, field workers, and remote employees).
- **Photo capture at sign-in** (the system records a photo of the employee — so you're sure who actually signed in).
- **GPS location recording** — the current location is recorded at sign-in for greater transparency when working from home or the field.
- **Job registration** — keep track of who is working on what and when. Log individual employee tasks and monitor time spent on specific jobs in real time.

**Modern attendance for modern companies.  
Join those who are moving forward.**

Thank you for being part of our growth.

**Get the feature activated today and  
simplify how you handle attendance!**
